

PAR TECH

Skill Builders to the
Nation

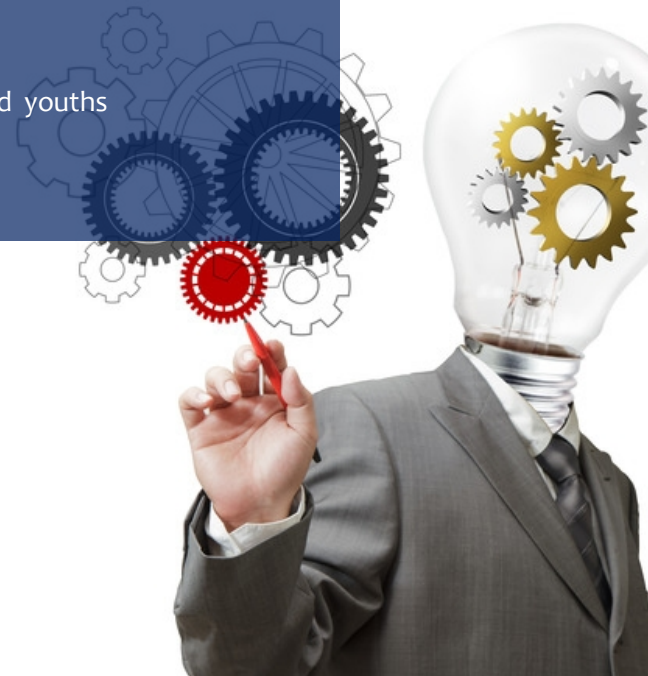

Par-Tech is an initiative of Par Excellence in order to facilitate skill development of nation's young and aspiring professionals, entrepreneurs, skilled/ semi-skilled workers, college graduates and school children. Par-Tech follows a multi-pronged approach in building the nation talent – training them directly, training the trainers/ teachers who train them and educating the institutions/ organizations who organize their training.

The purpose of Par-Tech is to act as a catalyst in developing skilled manpower for corporates across industries. This initiative is a strong impetus towards the training and teaching community that helps the nation overcome its need of skilling people.

GOALS

- To equip trainers/ teachers with the contemporary training/ teaching tools and techniques
- To train technical and vocational trainers to make their training sessions impactful
- To build the right skills and attitude among the young professional to help them succeed in their life and career
- To build the life skills among young students and boys and girls that prepare them to face the challenges of the world with ease and comfort
- To provide vocational training to unskilled/ semi-skilled youths for improving their employability
